Summary

Fullstack Developer with 2+ years shipping production apps across the full stack — React, Next.js, and React Native on the frontend; Node.js, Express.js, and Strapi on the backend. Currently building SaaS tooling at Deuex Solutions. Previously led four products at Retvens Technologies. 100+ open-source commits to OpenMetadata and 100+ LeetCode problems solved.

EXPERIENCE

Frontend Engineer

Jan 2025 – May 2026

Deuex Solutions

Remote

- Built a **Browser Extension** for the **Collate SaaS Platform**, integrated with the same backend to deliver Collate insights directly on supported websites via **content scripts**.
- Leveraged AI coding assistants (Claude, GitHub Copilot, Cursor) to accelerate development workflows, and integrated LLM APIs to prototype AI-powered features within the Collate platform improving customer experience
- Built contextual UI components (right-click menus, popups) enabling real-time in-page data visualization, improving user workflow efficiency for enterprise clients.
- Redesigned **authentication** and **authorization** flows for premium vs. free tiers, enforcing secure, role-based access control across client-side surfaces.
- Developed and contributed to 12thMen, a **React Native** based mobile application focused on real-time cricket scoring.

Junior Frontend Developer

Feb 2024 – Jan 2025

Retvens Technologies

On Site

- Owned end-to-end frontend architecture for four enterprise-grade production products, building scalable, latency-sensitive systems used by hospitality businesses across multiple regions.
- Drove cross-functional delivery of client-facing features by coordinating with backend engineers and designers, tracking KPIs to measure adoption and performance impact.
- Led migration from React to **Next.js**, leveraging SSR/SSG to improve performance and cross-browser reliability for customer-facing products used by hospitality clients.

CONTRIBUTION

OpenMetaData [Open Source] View

Feb 2025

- Delivered 100+ commits to OpenMetadata (enterprise data platform), contributing to core frontend modules, improving system scalability and developer experience across public-facing interfaces used by global teams.
- Monitored and improved component-level performance metrics, identifying rendering bottlenecks and reducing load times applying a data-driven approach to frontend quality.

Freelancing

Hustle With Kai View

Jan 2025

- Developed a full-featured **e-commerce and blog platform** with modern UI, optimized performance, and seamless navigation.
- Implemented comprehensive **SEO optimization**, improving site visibility, indexing, and organic reach across search engines.
- Worked directly with client as sole engineer — gathered requirements, made architecture decisions, and delivered a production e-commerce platform — demonstrating full product ownership and cross-functional judgment.

TECHNICAL SKILLS

HTML, CSS, Tailwind, TypeScript, Javascript, React.js, Next.js, Redux, RTK, Git/GitHub, Hosting, StoryBook, Express.js, Node.js, React Native, OAuth 2.0, GraphQL, Webpack/Vite, Jest/Testing Library, Figma, SQL, Accessibility, Performance Optimization, Micro-frontends
